Test Name	In Range	Out Of Range	Reference Range	Lab
CHROMIUM, RBCs Reporting Limit: 2.2 mcg/L	None Detected		mcg/L	

NMS Labs derived data:
 2.5th - 97.5th percentile range is
 <1.0 to 3.1 mcg/L (n=3019).
 The RBC sample used for analysis was measured by weight
 and multiplied by the density of human RBC (1.10 g/mL)
 to obtain mcg/L units.
 Analysis by Inductively Coupled Plasma/Mass
 Spectrometry (ICP/MS)
 Specimens for elemental testing should be collected in
 certified metal-free containers. Elevated results for
 elemental testing may be caused by environmental
 contamination at the time of specimen collection and
 should be interpreted accordingly. It is recommended
 that unexpected elevated results be verified by
 testing another specimen.
 This test was developed and its performance
 characteristics determined by NMS Labs. It has not
 been cleared or approved by the US Food and Drug
 Administration.
