01

Cannabidiol (CBD)/THC Ratio,Ur

CBD:THC Ratio Negative RATIO

02

INTERPRETATION: Neither CBD nor marijuana or marijuana/THC products detected in this sample.

This test measures Cannabidiol (CBD) and Tetrahydrocannabinol (THC) and metabolites in urine. The CBD:THC ratio is calculated using the sums of the respective metabolites and is intended to assist in differentiating the presence of Tetrahydrocannabinol (THC) metabolites due to the use of marijuana or medicinal THC from the presence of THC metabolites due to use of Cannabidiol (CBD) or hemp products that purportedly contain trace amounts of THC.

CBD:THC

Ratio

Interpretation

>=10.0

Consistent with the use of CBD products only

1.0 - 9.9

Indeterminate

<1.0

Consistent with marijuana, medicinal THC or mixed use

Interpretive ranges are provided as guidance and should not be considered definitive. Interpretation of results should include consideration of all relevant clinical and diagnostic information.

Analysis performed by chromatography with mass spectrometry.
