MDMA Screen, Urine

MDMA Screen, Urine Negative ng/mL Cutoff=500 01
Drug Screen Comment: 01

This assay provides a preliminary unconfirmed analytical test result that may be suitable for the clinical management of patients in certain situations. For workplace drug testing programs, preliminary positive findings should always be confirmed by an alternative method. Some over-the-counter medications, as well as adulterants, may cause inaccurate results. Screen Only testing does not meet the College of American Pathologists Forensic Urine Drug Testing Program requirements as a forensic urine drug test for workplace testing. All clients must ensure that their testing program conforms to applicable state and federal laws and employment agreements.
