EBV Antibody Profile

Test	Current Result and Flag	Previous Result and Date	Units	Reference Interval
EBV Ab VCA, IgM ⁰¹	<36.0	Negative Equivocal Positive	U/mL <36.0 36.0 - 43.9 >43.9	0.0-35.9
▲ EBV Ab VCA, IgG ⁰¹	<18.0	Negative Equivocal Positive	U/mL <18.0 18.0 - 21.9 >21.9	0.0-17.9
▲ EBV Nuclear Antigen Ab, IgG ⁰¹	<18.0	Negative Equivocal Positive	U/mL <18.0 18.0 - 21.9 >21.9	0.0-17.9

Interpretation:⁰¹**EBV Interpretation Chart**

Key: Antibody Present + Interpretation	Antibody Absent -		
	VCA-IgM	VCA-IgG	EBNA-IgG
No previous infection/ Susceptible	-	-	-
Primary infection (new or recent)	+	+	-
Past Infection	+or-	+	+
See comment below*	+	-	-

*Results indicate infection with EBV at some time however cannot predict the timing of the infection since antibodies to EBNA usually develop after primary infection or, alternatively, approximately 5-10% of patients with EBV never develop antibodies to EBNA.

EBV Early Antigen Ab, IgG

Test	Current Result and Flag	Previous Result and Date	Units	Reference Interval
▲ EBV Early Antigen Ab, IgG ⁰¹	<9.0	Negative Equivocal Positive	U/mL < 9.0 9.0 - 10.9 >10.9	0.0-8.9

Disclaimer

The Previous Result is listed for the most recent test performed by Labcorp in the past 5 years where there is sufficient patient demographic data to match the result to the patient. Results from certain tests are excluded from the Previous Result display.
