Gest. Diabetes 1-Hr Screen

Test	Current Result and Flag	Previous Result and Date	Units	Reference Interval
Gestational Diabetes Screen ⁰¹	113		mg/dL	65-139
According to ADA, a glucose threshold of >139 mg/dL after 50-gram load identifies approximately 80% of women with gestational diabetes mellitus, while the sensitivity is further increased to approximately 90% by a threshold of >129 mg/dL.				

Disclaimer
The Previous Result is listed for the most recent test performed by Labcorp in the past 3 years where there is sufficient patient demographic data to match the result to the patient
