General Comments & Additional Information

Clinical Info: NON REACTIVE REPORT

Date Collected: **10/07/2024**

HSV-2 Ab, IgG

Test	Current Result and Flag	Previous Result and Date	Units	Reference Interval
HSV 2 IgG, Type Spec ⁰¹	Non Reactive			Non Reactive
<p>Current guidelines and recommendations do not recommend routine screening for HSV-2 in asymptomatic individuals, including those that are pregnant. The detection of HSV-2 IgG antibodies in a single sample indicates previous exposure to HSV-2 but does not give information as to the site of HSV infection or the timing of exposure. The predictive value of positive and negative results depends on the population's prevalence and the pretest likelihood of HSV-2. HSV-2 IgG testing performed using the Roche Elecsys HSV-2 IgG assay.</p>				

Disclaimer

The Previous Result is listed for the most recent test performed by Labcorp in the past 5 years where there is sufficient patient demographic data to match the result to the patient. Results from certain tests are excluded from the Previous Result display.
