TESTS	RESULT	FLAG	UNITS	REFERENCE INTERVAL	LAB
Lactose Tolerance Test					
Glucose 1	50		mg/dL		01
Glucose 2	68		mg/dL		01
Glucose 3	88		mg/dL		01
Glucose 4	101		mg/dL		01
Glucose 5	125		mg/dL		01
Comment:					01

An increase in plasma glucose greater than 30 mg/dL is normal. Those with lactase deficiency will demonstrate bloating, cramps, and diarrhea, and will show a glucose increase of less than 20 mg/dL. False positive results may occur because of lack of the increase of blood glucose concentration attributable to normal insulin response to the carbohydrate load.
