**COMMENTS:**      FASTING: YES

Test Name	In Range	Out Of Range	Reference Range	Lab
LP PLA2 ACTIVITY	86		70-153 nmol/min/mL	EZ

Risk: Optimal <=123 nmol/min/mL; High >123 nmol/min/mL.

The Lp-PLA2 Activity test measures the function of the Lp-PLA2 enzyme versus the concentration (mass) of the enzyme. As a result of the differences in reporting ranges, patient test results from the Lp-PLA2 (PLAC(R)) mass assay cannot be used for direct comparison to the results of the Cardio IQ Lp-PLA2 Activity assay, but for your reference the risk cut points for the discontinued Lp-PLA2 Mass test were Optimal <200 ng/mL; Moderate 200-235 ng/mL; High >235 ng/mL.

This test was developed and its analytical performance characteristics have been determined by Quest Diagnostics Nichols Institute San Juan Capistrano. It has not been cleared or approved by FDA. This assay has been validated pursuant to the CLIA regulations and is used for clinical purposes.
