Lyme (B. burgdorferi) PCR

| Test | Current Result and Flag | Previous Result and Date | Units | Reference Interval |
|---|--|--------------------------|-------|--------------------|
| Lyme (B. burgdorferi) PCR ⁰¹ | Negative No B. burgdorferi DNA Detected. A negative PCR result for Borrelia burgdorferi on a blood sample does not eliminate the possibility of Lyme disease. CDC recommends that two-tiered serological testing in conjunction with clinical evaluation be used as the primary method of diagnosis. This test was developed and its performance characteristics determined by LabCorp. It has not been cleared or approved by the Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. | | | Negative |

Disclaimer

The Previous Result is listed for the most recent test performed by Labcorp in the past 5 years where there is sufficient patient demographic data to match the result to the patient. Results from certain tests are excluded from the Previous Result display.
