The clinical relevance of allergen results of 0.10-0.34  $\rm kU/L$  are undetermined and intended for specialist use.

Allergens denoted with a "\*\*" include results using one or more analyte specific reagents. In those cases, the test was developed and its analytical performance characteristics have been determined by Quest Diagnostics. It has not been cleared or approved by the U.S. Food and Drug Administration. This assay has been validated pursuant to the CLIA regulations and is used for clinical purposes.
