NT-proBNP

Test	Current Result and Flag	Previous Result and Date	Units	Reference Interval
NT-proBNP [01]	93		pg/mL	0-249
Please Note: [01]				

```
                                The following cut-points have been suggested for the
                                use of proBNP for the diagnostic evaluation of heart
                                failure (HF) in patients with acute dyspnea:
                                Modality                    Age          Optimal Cut
                                                          (years)          Point
                                -----------------------------------------------------
                                Diagnosis (rule in HF)      <50          450 pg/mL
                                                          50 - 75        900 pg/mL
                                                            >75         1800 pg/mL
                                Exclusion (rule out HF)  Age independent  300 pg/mL
```

Disclaimer

The Previous Result is listed for the most recent test performed by Labcorp in the past 5 years where there is sufficient patient demographic data to match the result to the patient. Results from certain tests are excluded from the Previous Result display.
