Ordered Items: **PSA, Ultrasensitive W/O Serial; Venipuncture**

Date Collected: Date Received: Date Reported: Fasting:

PSA, Ultrasensitive W/O Serial

Test	Current Result and Flag	Previous Result and Date	Units	Reference Interval
PSA, Ultrasensitive ⁰¹	0.484	0.392 01/08/2021	ng/mL	0.000-4.000

Roche ECLIA methodology.
According to the American Urological Association, Serum PSA should decrease and remain at undetectable levels after radical prostatectomy. The AUA defines biochemical recurrence as an initial PSA value 0.200 ng/mL or greater followed by a subsequent confirmatory PSA value 0.200 ng/mL or greater.
Values obtained with different assay methods or kits cannot be used interchangeably. Results cannot be interpreted as absolute evidence of the presence or absence of malignant disease.

Disclaimer

The Previous Result is listed for tests performed by Labcorp in the past 3 years where there is sufficient patient demographic data to match the results to the patient.
