

Patient Information	Specimen Information	Client Information
DOB: Gender: Phone: Patient ID:	AGE: Specimen: Requisition: Lab Ref #: Collected: Received: Reported:	

COMMENTS: FASTING:NO

Test Name	In Range	Out Of Range	Reference Range	Lab
VARICELLA ZOSTER VIRUS ANTIBODY (IGM)	<=0.90		<=0.90	AMD
< or = 0.90 Negative 0.91 - 1.09 Equivocal > or = 1.10 Positive				

Results from any one IgM assay should not be used as a sole determinant of a current or recent infection. Because an IgM test can yield false positive results and low levels of IgM antibody may persist for more than 12 months post infection, reliance on a single test result could be misleading. If an acute infection is suspected, consider obtaining a new specimen and submit for both IgG and IgM testing in two or more weeks.
